## **pyGroff, A tiny Syntax guide**

*Subhaditya Mukherjee*

### **1. Arguments needed**

- 1) -f : input file path
- 2) -o : output file name. (Dont give path!)

### **2. Main syntax**

**Note that you have to remove the <>**

% <title> : Adds a title like the one in this document

@ <author> : Author name

<text> : move to the center (left is default)

<text> : move to the right

# <text> : Heading level 1

## <text> : Heading level 2.. and so on

- <text> : Lists

~ : if you want to use one of the above in a sentence but do not want it to be formatted. Like this document.

\* <text> : bold

/ <text> : italics

\_ <text> : underline

+ <text> : New page

### **3. Need a cover page?**

**Use the arguments**

- 1) -c True
- 2) -n "Your name"

- 3) -t "Project title"
- 4) -d This is optional. But it can be another date format

**4. Limitations for now**

- 5) If you have added a title and an author, you must add a body or you will get errors
- 6) Formatting can only be applied to the whole row
- 7) If you are using < or > , please leave a line gap
- 8) If you see any numbering/formatting not working, just leave a line gap. It should mostly work out. If not. File an issue

Thank you
